

Majestic Mountain Sage, Inc.

MATERIAL SAFETY DATA SHEET

Identity: Pink Kaolin Clay

SECTION I

Company Name: Majestic Mountain Sage, Inc.
Address: 918 West 700 North Ste 104, Logan UT 84321
Telephone: 435.755.0863
Date Prepared: March 2007

CAS #: 1332-58-7
Chemical Name: Kaolin Mineral Clay

SECTION II: Physical Data

Appearance: Powder < 40 μ
Color: Pink Rose
Odor: Odorless
Gravity: Approximately 1.5

SECTION III: Safety

General Considerations: The only health concerns for this product is related to inhalations. Pink Kaolin is a naturally occurring mineral clay which may contain small amounts of crystalline silica. Prolonged and repeated inhalation of large amounts of crystalline silica over extended periods of time may result in lung conditions leading to but not limited to silicosis.

Inhalation: Prolonged inhalation may cause mucous membrane and respiratory irritation and if repeated over extended periods of time may result in lung conditions leading to but not limited to silicosis.

Carcinogenicity: The International Agency for Research on Cancer has determined that respirable crystalline silica is a known human carcinogen (group 1). The National Toxicology Program classifies respirable crystalline silica as a substance known to be a human carcinogen. Respirable crystalline silica is listed by California as a chemical known to cause cancer. However, whereas prolonged extensive inhalation of crystalline silica from clay has been known to cause silicosis, it remains yet to be determined as a cause of lung cancer.

Eye Contact: May cause mechanical irritation with redness and pain. Not a health hazard.

Skin Contact: May cause drying of the skin. Not a health hazard.

Ingestion: Ingestion of large amounts may cause gastrointestinal irritation and constipation. Not a health hazard.

SECTION IV: Safety Ratings

OSHA Permissible Exposure Limit (PEL): 5 mg/m³ (respirable) Time Weighted Average

ACGIH Threshold Limit Value (TLV): 3 mg/m³ (respirable) Time Weighted Average

NFPA Ratings:

Health: 1

Flammability: 0

Reactivity: 0

HMIS Ratings:

Health: 1

Flammability: 0

Reactivity: 0

SECTION V: First Aid

General Considerations: Pink Kaolin clay is a medicinal substance that is beneficial when used properly. In case of accidental exposure, it should be washed out with water.

Inhalation: Although the only potential hazard, temporary exposure to dust is not in need of first aid measures. In case of respiratory irritation, remove the subject from the source and expose to fresh air.

Eye Contact: Flush immediately with large amount of water. Avoid rubbing the eyes which could only cause additional irritation.

Skin Contact: Remove the clay with large amounts of water. Do not use soap. If the skin becomes dry, rehydrate with water and oil.

SECTION VI: Fire Protection and Reactivity

Stability: stable

Incompatibility (materials to avoid): Contact with hydrofluoric acid may generate heat.

Fire Hazard: This product is not combustible. No special fire fighting procedures are needed except the wear of self contained breather apparatus.

SECTION VII: Handling and Storage

Handling: Avoid generating and breathing dust. Use with adequate ventilation. If clothing becomes contaminated, wash in water. Wash thoroughly after handling.

Personal Protective Equipment (PPE)

Eye Protection: None needed of normal use. Eventually safety glasses or goggles can be used.

Skin Protection: None needed of normal use. Eventually gloves can be used.

Respiratory Protection: None needed for normal use. For operations where the exposure limit may be exceeded, a NIOSH approved high efficiency particle respirator is recommended. Equipment selection depends on contaminant type and concentration, select in accordance with 29 CFR 1910.134 and good industrial hygiene practices.

Storage: Store in a dry area.

SECTION VIII: Disposal

This product is a natural source of clay minerals abundant on the surface of the planet. Disposal is non polluting but should be done in accordance with federal, state and local regulations.

SECTION IX: Toxicity

This product is not toxic by dermal contact, ingestion and even inhalation if not performed under excessive prolonged repeated periods of time. This product is not hazardous.

SECTION X: Regulations

This product is not subject to the Comprehensive Environmental Response and Liability Act of 1980 (CERCLA).

NOTE: The information in this MSDS is compiled from sources considered to be accurate to the best of our knowledge and applies to activities within the scope of the intended use of the product. No warranty is expressed or implied with respect to completeness or continuing accuracy of the information given here. User should satisfy themselves that they have all current data relevant to their particular use.
